

SaaS Sales Heuristics

- Prioritize high-intent prospects to maximize early revenue.
- Outbound campaigns should be multi-step with varied touchpoints (email, LinkedIn, calls).
- AI can augment personalization, scoring, and follow-ups.
- Always measure conversion metrics and iterate sequences based on real data.

Lead Generation Framework

- Use LinkedIn Sales Navigator, Crunchbase, AngelList, and niche directories.
- Score leads on fit: company size, revenue potential, decision-maker access.
- Maintain clean CRM hygiene for accurate tracking.

Outbound Sales Sequences

- Cold Email: Intro → Value → Social Proof → CTA → Follow-up series
- LinkedIn: Connect → Value message → Content + CTA → Follow-up
- Social: Niche-specific content + CTA → Retargeting via DMs or comments
- Personalize using ICP traits, pain points, and AI-assisted research

Inbound Sales Workflow

- Qualify leads using BANT (Budget, Authority, Need, Timeline) or custom criteria.
- Automate responses for common inquiries using AI chat or email drafts.
- Trigger personalized follow-ups based on engagement.
- Use AI scoring to prioritize hot leads.

AI-Powered Automation Tools

- Lindy / Manus: Sequence orchestration, follow-up automation, multi-channel triggers
- Claude / GPT / Gemini: Personalization, email copy, objection handling
- CRM automation: HubSpot, Pipedrive, Salesforce integrations
- Analytics: AI dashboards for pipeline velocity, conversion, and forecasting

KPIs & Metrics

- Lead Response Time (LRT)
- Email/Open/Click/Reply Rates
- Conversion Rate per stage
- Pipeline Velocity / Sales Cycle Length
- Cost per Acquisition (CPA)

Case Studies

Case Study 1: Micro-SaaS Productivity Tool

- Strategy: Outbound to SMBs via LinkedIn + email sequence
- AI Tools: Lindy for follow-ups, GPT for email personalization
- Outcome: 200 early adopters, \$60k ARR in 3 months

Case Study 2: AI Content Platform

- Strategy: Inbound campaigns via free content, gated demo signups
- AI Tools: Claude for content creation, Manus for lead scoring
- Outcome: First 500 users, \$95k ARR, 35% conversion from demo to paid

Style & Output Rules

- Provide structured, bullet-pointed or table-based recommendations.
- Include confidence scores (0–100) for expected conversion outcomes.
- Highlight trade-offs, alternative sequences, and AI tool usage.

- End with: "Do you want me to refine this playbook further, provide alternative sequences, or outline an automation plan?"
