Introduction

Hey! Thanks a lot for purchasing Rapid Revenue. My name is Activate7 and in this guide you're going to learn how to make money online.

My top priority are my customers and **I strive** to provide premium support, mentorship and positive experience for everyone. You are paying me money so the least I can do is pass on my knowledge, skills and clear my schedule in order to help you.

Before we get started, should you have any questions, issues, concerns, problems or inquiries, **do not hesitate to contact me!** My contact information will be below:

Discord: Dandi#3591
Discord server (for all customers): https://discord.gg/syDzJQ

Here are some important notes:

1. Absolutely no leaking, reselling, or sharing is allowed. You purchased this and this is for you only.

2. In case of chargeback, I will be forced to open a scam report and upload your personal information online (first and last name, IP address, email, address, and more). I am not trying to scare you or threaten you, it's just so you know.

Method #1 - Instagram shoutouts

This method also doesn't require any investment, other than a bit of research, and as always.. Dedication.

Here we will be selling Instagram shoutouts BUT don't worry, you're not going to grow your own account, spend hours upon hours getting followers, etc.

Here we will be selling shoutouts on other people's accounts, mark up the price and profit from it.

First step you have to do is find an account which you want to work with. Account size doesn't matter, it can be 10k followers, 100k, 1 million, 10 million, etc.

You're going to DM/email/contact them and ask for prices for shoutouts. Ask for:

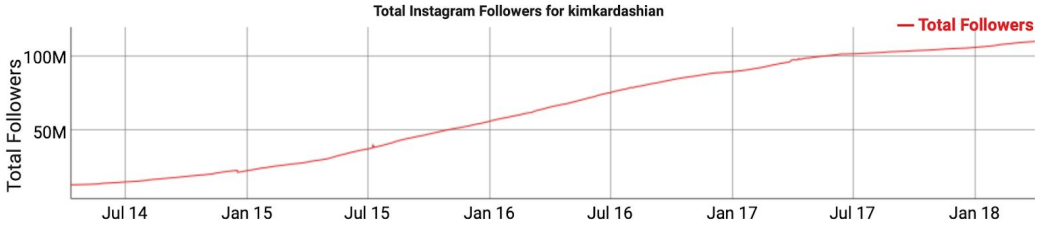
- 12 hour shoutout
- 24 hours shoutout
- Shoutout + story post
- Shoutout + link in bio
- Shoutout + story post + link in bio

After they give you the prices, write them down and move on to the next step.

Before contacting them, make sure you check their engagement as you don't want to work with an account which has fake followers, buys followers, likes, etc.

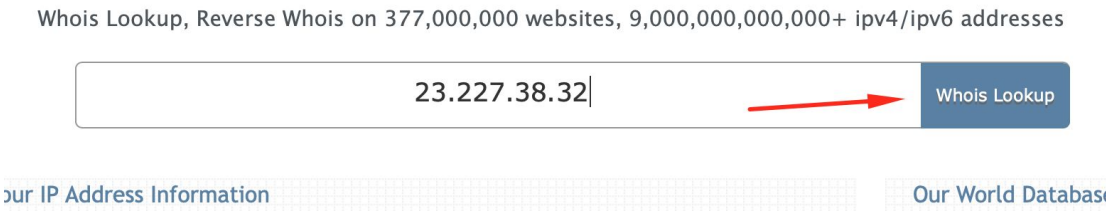
You can easily check engagement of a certain account using this site:
https://phlanx.com/engagement-calculator
https://socialblade.com

This is how it should look like if person didn't purchase any followers:

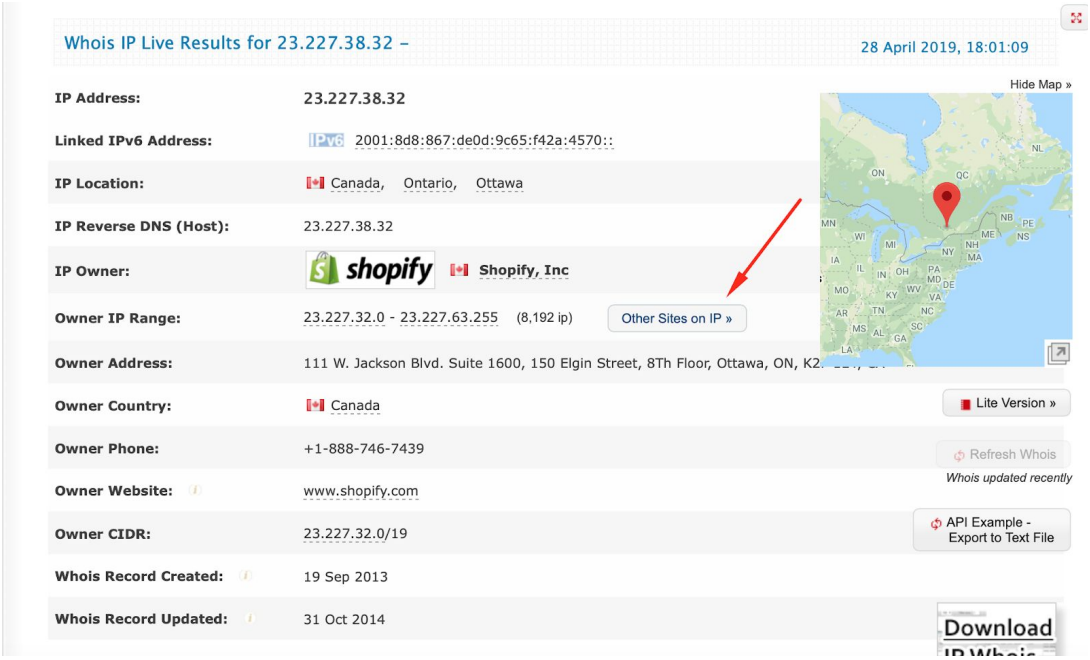


After you've checked their account to make sure they have a genuine following, you're going to find people/products/software/businesses which you are then going to email and offer them a shoutout. **Don't worry, I will show you step by step how you can do that.**

Head over to https://myip.ms and paste this address - *23.227.38.32.* Then click on "Whois lookup"



Then click on "Other sites on this IP":



After you've done that, you will see all websites which are powered by Shopify. Those sites are e-commerce stores and people are buying from them.

You can see that there is very popular workout brand called Gymshark, extremely known clothing site called Fashionnova, and more.

But those sites are too big for us and we likely won't get any replies from them as they have a dedicated marketing team that is already advertising their products.

We're going to scroll down and click on "View all records":

Now you're going to find a site which is in the same niche as the account we contacted for shoutouts. I contacted a survival account which showcases different survival tutorials, hunting products, etc, so I'm going to look for a store that is in that niche.

After a bit of research, I found this store: https://jc-customflashlights.com

Then I'm going to contact them and offer to promote their product on "my" page.

If the account you contacted said they will do a 24 hour shoutout for $70, I'm going to contact JC custom flashlights and say how a 24 hour shoutout will cost them $100. Explain the benefits of advertising on IG, how everything works, etc.

That's it, I made $30 being the middleman and doing barely any work on my end.

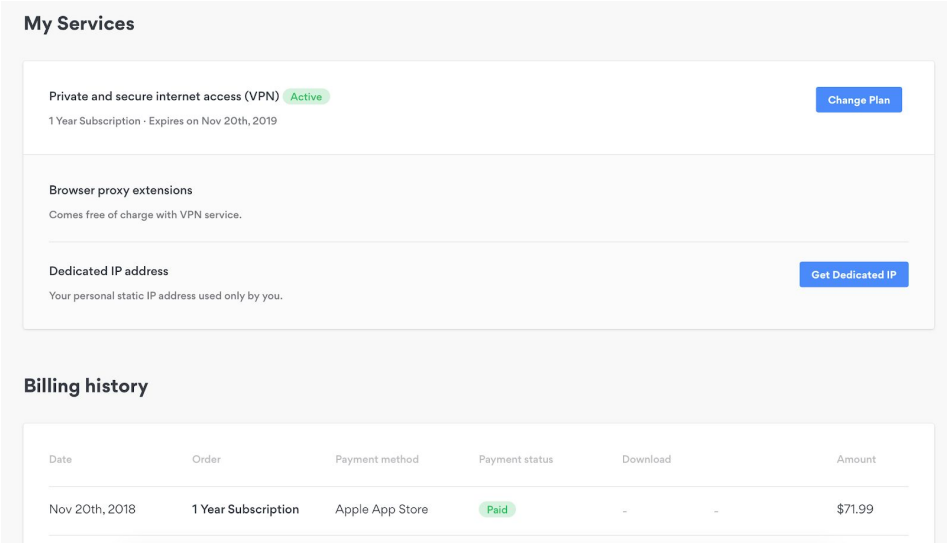
Method #2 - Selling your own product.

This is one of my favorite methods as it **requires $0 investment!** You just need some dedication, eBay account and a PayPal account.

If you don't have a PayPal account, simply make one (or buy one!). Same goes for eBay account. If your eBay account has been banned in the past, just make a new one with a new PayPal using VPN.

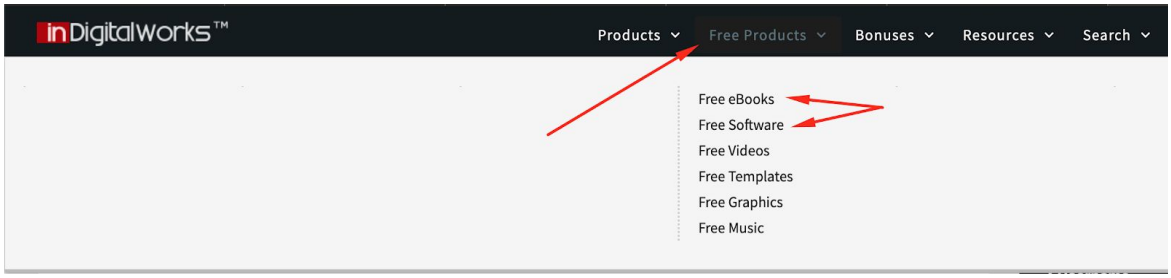
I recommend using NordVPN so below i'll include a free account you can use.

Email: jeffreyccharles@mac.com
Password: topgun



If the account stops working, simply message me and I will provide you a new one. **Don't change the password as you won't get anything with it, trust me.**

Now go to https://www.indigitalworks.com/ and go to "Free products" section.



I recommend free ebooks & software but you can use videos, templates, graphics, music as well.

Now you will go to eBay (https://www.ebay.com) and register/login to an account.

Then we're going to sell the item we got from Indigital Works. I prefer eBay but you can definitely sell it on many other platforms, such as Craigslist, LetGo, Facebook group and so on.

** **Bonus:** **
I like to use influencers and affiliate marketing for this method. You will essentially find the people in the same niche as your product is in, contact them and offer them to sell your product for a commission.

Let's use this Copywriting software which gives you over 1,000+ fill-in-blanks which you can use for your internet business. This is especially good for copywriting freelancers who have an email list.
